### EDUCATION

1985	Ph.D.	The Johns Hopkins University, The Johns Hopkins Medical Institutions Baltimore, MD Neurosciences, Immunology and Infectious Diseases, and Experimental Radiology
1979	M.S.	Massachusetts Institute of Technology, Cambridge, MA Biological Oceanography, Earth and Planetary Sciences
1971	B.A.	Washington University, St. Louis, MO) Biology and French

### PROFESSIONAL APPOINTMENTS

2017-present	Senior Research Scientist	Department of Biomedical Engineering Hearing Research Center Boston University
1993-2018	Assistant Professor	Department of Otolaryngology Harvard Medical School
2014-present	Chief Scientist Senior Scientist emeritus (joint appt.)	WHOI CT Research Imaging Facility Biology Department Woods Hole Oceanographic Institution
2002-2013	Senior Scientist Tenured (joint appt. with Harvard Medical School)	Biology Department Woods Hole Oceanographic Institution
1997-2002	Associate Scientist (joint appt. with Harvard Medical School)	Biology Department Woods Hole Oceanographic Institution
1988-1993	Instructor  Research Associate	Department of Otolaryngology Harvard Medical School Cochlear Implant Research Laboratory, Massachusetts Eye and Ear Infirmary
1987-1988	Lecturer	Organismic and Evolutionary Biology,

		Museum of Comparative Zoology, Harvard University
1985-1987	Post-doctoral Fellow	Eaton-Peabody Laboratory of Auditory Physiology Harvard Medical School
1985-1986	Post-doctoral Fellow	Communications Biophysics Group, Research Laboratory of Electronics, Massachusetts Institute of Technology

### **Adjunct Appointments and Fellowships**

2017-present	Alfred Wegener Institute for Polar Research (Alfred-Wegener-Institut für Polar und Meeresforschung), Bremerhaven, Germany as Helmholtz International Fellow, Earth and Environment, Helmholtz Association, Berlin, Germany	
2017-2018	Neurosciences Scholar and Institute for Chemistry and Biology for the Marine Environment Fellowship, Hanse-Wissenschaftskolleg	
2016-present	Designated Expert, U.S. Department of State, Near Eastern Affairs/Iraq/ECON; Environment, Science, Technology, and Health	
2016	Embassy Science Fellow, Berlin Embassy, U.S. Department of State, Arctic Policy, Environment, Science, Technology, and Health	
2015-2016	Jefferson Science Fellow, National Academy of Science, U.S. Department of State, Bureau of Near Eastern Affairs/Iraq/ECON/ESTH	
2015	Fellow and Scholar, Neurosciences and Earth Sciences Research, Hanse-Wissenschaftskolleg Institute for Advanced Study, Alfred Wegener Institute and University of Oldenburg, Auditory Physiology, Germany	
2013- present	Professor of Physics, Centre for Marine Science and Technology, Imaging and Applied Physics, Curtin University (Western Australia Premiere's Fellow)	
2013-2015	Adjunct Professor, College of Veterinary Medicine, Murdoch University	
2011-present	Adjunct Professor, Biology, Massachusetts Institute of Technology,	

### **AWARDS AND HONORS**

2018	Institute for Marine Chemistry and Biology (ICBM) Fellow and Award, University of Oldenburg
2017	Helmholtz International Fellow and Award, Earth and Environment
2016-2017	Meritorious Honor Award, U. S. Department of State
2016-2017	Embassy Science Fellow, National Academy of Sciences
2015-2016	Jefferson Science Fellow, National Academy of Science
2015	First Jointly Elected Fellow, Neurosciences and Marine Sciences, Hanse-Wissenschaftskolleg
2014	Premier's Fellow, Western Australia Fellowship Program
2013	Excellence in Science Communication Award, Society for Marine Mammalogy
2012	AAAS Fellow, Biology, for Advances in Comparative Anatomy and Biomedical Imaging, American Association for the Advancement of Science

2012	Acoustical Society of America, Animal Bioacoustics, Individual Expert in Bioacoustics (ASAIE)
2012	Member of the Corporation of the Marine Biological Laboratory, Elected by Science Council, 124 <sup>th</sup> Class
2011	Functional MRI, Honors Fellowship, Martinos Imaging Center, Harvard Medical School
2010	Marine Mammal Research Fellow, Aquatic Mammals, European Cetacean Society
2008	Overseas Fellow, Royal Society of Medicine, UK
2007-2008	Senior Fellow, Auditory Biomechanics Section NIH/NIDCD National Institutes of Deafness and Other Communication Disorders, National Institutes of Health
2001	Fellow, Acoustical Society of America
2001-2004	Fellow, WHOI Ocean Life Institute
2000-2002	Featured Principal Investigator, Office of Naval Research
1998	Seaver Institute Research Award
1997	Mellon Foundation Independent Research Award
1983	Delta Omega Honorary Society, Alpha Chapter Merit Award
1982-1984	NSF Sensory Systems Doctoral Dissertation Research Award
1982-1984	Fellowship in Residence, Smithsonian Institution
1982-1984	Dean's Fellowship, Johns Hopkins Medical Institutions
1981, 1982	Achievement Rewards for College Scientists; ARCS Foundation Fellow and Scholarship Award
1980-1984	NIH Honors Fellowship Award
1978	Sigma Xi Research Award

### **PROFESSIONAL MEMBERSHIPS**

2012-present	International Society for Neuroethology (ISN)
2012- present	American Association for the Advancement of Science (AAAS)
2009- present	International Association of Aquatic Animal Medicine (IAAAM)
2008- present	Royal Society of Medicine (RSM)
2005- present	European Radiological Society (ERS)
2005- present	The Explorer's Club
2004-present	International Society for Vertebrate Morphology
2004- 2015	Association of Military Surgeons of the United States (AMSUS)
1996- present	Radiological Society of North America (RSNA)
1982- present	Acoustical Society of America (ASA/Fellow 2003)
1987- present	Association for Research in Otolaryngology (ARO)
1984- present	Society for Marine Mammalogy (SMM)
1987- 2012	International Society for Stereology
1978- present	Sigma Xi

### **SPECIALTY COURSES/ACCREDITATIONS**

2011	Advanced Functional MRI Imaging, Martinos Center for Biomedical Imaging, Harvard Medical School.
2006	Advanced Forensic Pathology, Armed Forces Institute of Pathology/Certificate
2005	Basic Pathology, MIT-Health Sciences and Technology Program/Faculty Auditor
2004	Veterinary Pathology, Armed Forces Institute of Pathology/Certificate
2003	Neuroradiology and Neuropathology, Armed Forces Institute of Pathology /Certificate

1995 Forensic Pathology, Armed Forces Institute of Pathology/Certificate

## RESEARCH INTERESTS

Functional Anatomy of the Ear; adaptations for air and water, infra to ultrasonic hearing  
 Marine Mammal Functional Anatomy  
 Effects of Noise in Marine and Terrestrial environments  
 Evolution of hearing  
 Three-dimensional functional modeling of head and neck anatomy and sensory systems  
 Cochlear Implant position and speech perception  
 Blast and Traumatic Brain Injury trauma diagnostic imaging

My work to date has been divided between the theoretical and the practical. On the theoretical side, I conduct basic research on the functional anatomy vertebrate auditory systems, particularly how differences in ear structures of marine mammals vs land mammals are related to different hearing abilities as well as niche dependent effects on significant acoustic features; e.g. wavelengths in air vs. water and prey related frequency differences in biosonar. In recent years, this work has also been fundamental to our understanding of the emerging issues about sound in the Ocean and, consequently, much of my time has been devoted to assisting with ocean use policy, assessment of mitigation strategies, and outreach on the topics of ocean noise and potential impacts.

My research is founded on biomechanical analyses of the auditory system of extant and fossil species and measurement and analysis of the topography and material properties of key tissues. The data are obtained by both classic dissection and microscopy techniques as well as recent and developing technologies such as macro and micro computerized tomography (CT scanning), magnetic resonance imaging (MRI), finite element and finite difference modeling (FEM/FDM) and atomic force microscopy (AFM). On the practical side, my skills in biomedical imaging and dissection are used to assist forensic analyses of human trauma and strandings. These two areas cross-pollinate; the basic research helps us to understand how changes in an ear, brought about by pathology, correlate with specific parameters of hearing loss, and the work with human cases, in turn, gives invaluable opportunities for interactive development of ways to better assess head and neck structure, both normal and abnormal in other vertebrates. In many cases, looking at the anatomy of a specimen, current or past, as not only an example of its taxon but also as a record of its particular life history can enrich our knowledge.

A major focus of my work is how animals evolved infra to ultrasonic hearing, particularly those with exceptional acuity or living in extreme habitats, like bats, elephants, dolphins and whales, deep divers, desert rats, mole rats and marine infauna. The most recent findings from this work include the development of a mathematical model that explains how cochlear spiral configurations are related to the ability to hear ultra-low frequencies, a feature that I was able to demonstrate is common to modern whales and elephants and is found in varying degrees in fossil proboscideans back to gomphotheres. This work also involves frequency mapping models for the cochlear spiral to estimate hearing ranges in extant and extinct species. I have also demonstrated the presence and likely parallel evolution of specialized fatty tissues that act as pinnae in cetaceans, aquatic reptiles, and diving birds and are a key feature for underwater sound reception and localization.

Research on fundamental mechanisms also entails comparing normal and impaired ears to determine how location and nature of pathologies relate to changes in hearing ability. The mapping and ultrahigh resolution CT techniques developed in the basic animal research have become valuable tools in the human studies as well, particularly for cochlear implant and explosive trauma and tinnitus research. The techniques developed for the exceptionally large and dense dolphin head structures are now used for

submillimeter diagnostic exams of *in vivo* abnormalities and intracochlear electrode locations in implant patients. Current studies are focusing on the relationship of electrode position to speech perception and on mechanisms of insertion trauma. Results show the interaction of the array curvature with that of the natural cochlea is a critical factor in the success of the implant placement. While the imaging methods and data on patient differences have already had some impact on surgical planning, the greatest benefit from this research will likely be, in the long term, to foster improvements in cochlear implant designs and to provide intraoperative techniques for optimizing array placement in every patient.

Most recently, the ultrahigh resolution imaging algorithms developed in this research have been applied to a range of applied studies. Images and analyses have been supplied for volumetric analyses in traumatic brain injury cases and to map fragment and shrapnel patterns for the Veterans Administration and the Armed Forces Institute of Pathology. Similar analyses are provided to the Medical Examiners Office of the Boston Police Department to aid in facial reconstruction and victim identification. In addition, a collaborative study with researchers at Harvard Medical School on in utero hearing is being explored to improve premature infant survival as well as an *in vivo* study with Boston University Massachusetts General Hospital of marine animal cortical activity.

2011- present	Michael Gray	Thesis Committee	Ph.D. student, GeorgiaTech Univ.	Ph.D. awarded 2016
2011- present	Sherri Eldridge	Thesis Committee	Ph.D. student, Boston Univ.	Ph.D. awarded 2018

**Postdoctoral  
Fellows  
Scholars**

2001-2004	Heather Koopman, Ph.D.	Research Advisor	Postdoctoral Scholar	Associate Professor, Univ. of N. Carolina at Wilmington
2001-2004	Soraya Bartol-Moein, Ph.D.	Research Advisor	Postdoctoral Investigator	Asst. Prof. Virginia Wesleyan University
2004-2005	Jennifer Hammock, Ph.D.	Research Advisor	Postdoctoral Investigator	Research Associate, Smithsonian Institution,
2009	Songhai Li, Ph.D.	Research Advisor	Postdoctoral Investigator	Hydrobiolgoy Institute, Wuhan, China
2008-2010	T. Aran Mooney, Ph.D.	Research Advisor	Postdoctoral Scholar	Assoc. Scientist, WHOI

2018-present	Irene Rocca, Ph.D.	Research Advisor	Postdoctoral Fellow	Helmholtz Institute Marine Bioacoustics, Oldenburg University, Germany

### Guest Students/Co-Advisor

Alexandra Scharr, graduate student, Stanford, Neurosciences, 2011  
Maggie Ryan, High School Summer student, 2011  
Matthew Dunn, Boston College Undergraduate, 2009-2011  
Louise Brooks, University of California, graduate student (2004-2005)  
Susannah Prahl, Kiel University, Germany, graduate student (2000-2006),  
Klaus Lucke, Kiel University, Germany, graduate student (1998-99, 2002-2005)  
Pedro Frazao Univ. of Lisbon, Portugal, senior honors research thesis (1999)  
Paco Olliverdes, Univ. of Texas, doctoral student (1999)  
Itamar Tsur D.V.M.; Ph.D. candidate, Biology, Univ. of Tel Aviv (2000, 2008, 2009, 2012)  
Chantal Van Ginkel, Eckerd College, undergraduate summer student fellow (2013)

### TEACHING

#### Courses Taught

2012	WAZE Animal Imaging, Tufts University
2009, 2011	Marine Biology Laboratory, Biology of the Inner Ear
2010	WHOI, Marine Mammals: Principles of Neuroethology and Marine Sensory Systems
1998-2000	WHOI, Behavior of marine animals: Physiology of Perception
1996-1999	WHOI/MBL/BUMP, joint course: Biology of Marine Mammals
1987-1988	Harvard University, Course Laboratory Assistant, Comparative Physiology
1981-1984	Towson State University, Introductory Biology, Evolutionary Biology
1982-1983	Goucher College, Animal Behaviour
1974-1979	Suffolk University, Embryology, Introductory Biology, Marine Biology

#### Guest Lectures

2012	Guest Lecturer	University of Massachusetts, Boston, Graduate Neurosciences
	Guest Lecturer	WAZE Lecture: Veterinary Imaging, Tufts Veterinary School
	Guest Lecturer	Special Lecture Series: Marine Mammal Sensory Systems and Necropsy Techniques: Taiwan National University, National Chiayi University, National Changkung University
2010	Lecturer/Prosector	Tufts University Veterinary School, Special lecture on Veterinary Imaging AquaVet Special Lectures and Practical Sessions on Radiologic Imaging
2009	Lecturer/Prosector	Necropsy Workshop II, Ministry of the Environment and Bahamas Marine Mammal Research Organisation. Nassau, Bahamas Necropsy Workshop: Cook Islands Stranding Network, Rarotonga, CI
2008	Lecturer/Prosector	Necropsy Workshops I, Ministry of the Environment and Bahamas Marine Mammal Research Organisation. Nassau, Bahamas
2005	Lecturer/Prosector	Necropsy Workshop, Australian Ministry of the Environment, Conservation, Wildlife Impacts and Protection, Dept. of the

		Environment and Heritage, Hobart, Tasmania and Sydney, NSW, Australia.
2004	Lecturer	NOAA Fisheries Lecture Series on Ocean Acoustics
1989-present	Lecturer	In-service Radiology lectures, MEEI
	Lecturer	Clinical Pathology Conferences, Department of Otolaryngology and Laryngology, Harvard Medical School, MEEI
1987- present	Lecturer	Sensory Physiology, Marine Mammal Biology, Brandeis University
2001	Faculty	Pauley Foundation Workshop, Univ. of Hawaii Institute of Marine Biology
2000	Lecturer	Animal Behaviour and Communications Workshop University of California at Davis
1999	Faculty	Acoustical Society Short Course, Marine Mammal Bioacoustics
	Visiting Professor	Institute of Biology, Odense Universitet, Denmark
1998	Lecturer	Lowell Lecture Series; New England Aquarium
	Guest Lecturer	Neurosciences Forum, Parmley Hearing Research Institute, University of Chicago
	Visiting Professor	Acoustical Engineering/Biology, National University of Singapore
	Faculty	Cochlear Implant Workshop, American Academy of Otolaryngology-Head and Neck Surgery
1997	Faculty	Surgical Workshop; American Academy of Otolaryngology-Head and Neck Surgery
	Lecturer	Underwater Acoustics and Low Frequency Sonar: Naval War College
	Guest Lecturer	Sensory Neurosciences Program, Zoology Department, University of Maryland
1996	Senior Faculty	Marine Forensics Workshop; National Marine Fisheries Service and Armed Forces Institute of Pathology
	Senior Faculty	Office of Naval Research Biosonar Workshop, University of California at Santa Cruz
	Instructor	Temporal Bone Workshop, Association for Research in Otolaryngology
1995	Instructor	Acoustical Society of America, Short Course in Marine Mammal Bioacoustics
	Lecturer Section Instructor	NIH Consensus Development Conference, Cochlear Implants Course: Cochlear Implants: The Clinical Issues, Massachusetts Eye and Ear Infirmary
1994	Visiting Lecturer	Earth and Planetary Sciences, Massachusetts Institute of Technology
1993	Guest Lecturer	Neuroradiology Grand Rounds, Barnes Hospital and Washington University School of Medicine
	Guest Lecturer	Neuroscience Colloquium: Howard Baker Lectures, Dept. of Psychology, Florida State University
	Faculty	3-D Reconstruction of Temporal Bones, Satellite Course, Amer. Acad. of Otol.-Head and Neck Surgery
	Senior Faculty	In situ sectioning of cochlear implants, Satellite Course, Amer. Acad. of Otol.-Head and Neck Surgery
1992	Visiting Scientist	Neurobiology, Shoals Marine Laboratory, Cornell University
1991	Research Associate	Sensory Neurobiology Program, Syracuse University

**Special Lectures/Webinars****Webinar Courses**

- 2018 Webinar: Sound Reception in Marine Mammals: How Underwater Hearing Works and What We Know About Hearing Loss. Webinar for Regulators (510 registrants), broadcast April 2018. Podcast: <https://dosits.org/decisionmakers/webinar-series/webinars-2018/sound-reception-mammals2018/> April 2018
- 2015 DOSITS Webinar: Underwater Acoustics: Webinar Series for the International Regulatory Community  
Marine Mammal Underwater Hearing: Sound Production, Sound Reception, and Sound Impacts
- 2012-2013 HIVE Launch (Hub for Immersive Visualisation for eResearch) Presentations on Stereoscopic 3D Visualization of Marine Mega to Micro Species, Curtin University  
WAZE Lecture: Veterinary Imaging, Tufts Veterinary School;  
Special Lecture Series: Marine Mammal Auditory Systems and Necropsy Techniques: Taiwan National University, National Chiayi University, National Changkung University  
WHOI CT and Necropsy Facilities Tours: 15 tours/talks for Development, Media, Trustees, K-12 groups, WHOI Departmental Guests (Marine Policy, AOPE, Marine Operations), BP, Senate staffers, Middle East Science Ministers Program, U.S. Dept of State, China Educational Ministers, WHOI Directorate visitors.
- 2011 Biology of the Inner Ear (Marine Biology Laboratory), Faculty, AquaVet Lectures and Practical CME Sessions on Radiologic Imaging; MIT, Brains, Minds, Machines Conference.  
WHOI CT and Necropsy Facilities Tours: 18 tours/talks for Development, Media, Trustees, Meetings, Regional School groups, NSF Program Management, WHOI Departmental Guests (Geochemistry, Biology, Acoustical Oceanography, Marine Policy), NUWC. JIP, Navy, BP, Sen. Scott Brown, WHOI Directorate visitors.
- 2010 Massachusetts Maritime Academy, Special Lecture  
WHOI CT and Necropsy Facilities Tours: 10 tours for Development, Media, Trustees, Meetings, Regional School groups, WHOI Departmental Guests (Geochemistry, Biology, Acoustical Oceanography)
- 2009 Biology of the Inner Ear, Lecture and Faculty, Marine Biology Laboratory  
AquaVet Lectures and Practical CME Sessions on Radiologic Imaging  
Ocean Life Institute Trustee Meeting

## Case Reports

1989-present Clinical Reports: Detailed analyses on pre and post operative status of head and neck anatomy and pathologies in implant patients, trauma victims, forensic requests, ear and throat prosthetics, and reconstructive surgery cases. Reports filed with surgeon, radiology, and law enforcement agencies.

To date: 130 in vivo patient case reports; 29 cadaveric reports.

1992-present Marine Mammal Case Reports: Detailed analyses of gross and microscopic anatomy including cause of death, chain of custody, and pathology cases for all marine mammal groups. Reports filed with NOAA Fisheries and other governmental agencies.

To date: 57 cadaveric reports.

2011-present Boston Police Department “Cold Case” Imaging reports. Detailed analyses of gross external and internal anatomy of victim tissues based on CT imaging; images supplied for facial reconstruction. Reports filed with Boston Police Dept. and the Medical Examiner’s Office.

To date: 6 postmortem CT reports.
